

UNIVERSITY OF DAR ES SALAAM

COLLEGE OF INFORMATION AND COMMUNICATION TECHNOLOGIES

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

NAME: LYIMO GLADSON

PROJECT TITLE: CREATIVEFOLK

PROJECT FOCUS: WEB

ID: 2017-04-07376

ABSTRACT:

Creativefolk is a react application that lets you find the potential and most talented people for your creative projects.

The application is intended to bring students closer to collaborate in almost anything by a means sharing thoughts, ideas and intelligence and bring all together into action by creating and building projects, starting business, improve knowledge and even finding potential co-founders.

There has been an issue that students only end up learning and sometimes get motivated to start something but when it comes to implementation of the knowledge gained or building something out of what they've learned by one's self it's intimidating most are not confident enough to do something on their own, also they don't know who exactly to reach for help, and this is where **creativefolk** comes in, you find someone with enough experience in specific fields and collaborate with them to do your projects and through the process you both improve knowledge and experience of what you already know and bring idea to life.

The application is provided with filter functionalities and a livesearch which makes it a lot easier to find the exact potential people you can reach to for collaboration.
